

# Payroll Overview

Whether you are a small business owner or a payroll professional responsible for ensuring thousands of employees get paid on time, payroll is often complicated and time-consuming

## KEY FEATURES

PayBridge automates labor-intensive processes, while protecting sensitive payroll data. Some of our key features are:

- ✓ **Web-based Solution:** Scalable and securely-hosted. Verify and process payroll from anywhere, anytime.
- ✓ **Real-Time Performance:** Immediate access to payroll data, as well as the ability to view preliminary payroll reports prior to final posting.
- ✓ **Census Data:** PayBridge's Census Vault enables on-demand, electronic access to payroll census data which is critical to plan compliance.
- ✓ **Superior Customer Support:** PayBridge provides a client-assigned Customer Service Representative to guide and assist you with payroll questions or needs—no more 800 number call centers.
- ✓ **Integrated:** PayBridge payroll and 401(k) integration eliminates the need for the client to maintain or edit contribution files.
- ✓ **Single Database:** One database. One employee record. PayBridge unifies payroll, HRIS, timekeeping, benefits and retirement which eliminates manual and repetitive data entry.
- ✓ **Simplified Implementation Process:** The entire implementation process is managed by the PayBridge implementation team. All year-to-date data is loaded prior to initial payroll processing.
- ✓ **Platform Independent:** PayBridge integrates with virtually any retirement or insurance plan.
